
Title: The Quest Of The Avatar

Author: Unknown

In days not long past,
the Council of Wizards
erected shrines to the
eight virtues, that
people throughout the
land might meditate upon
them. It was through
studying the eight
virtues and the three
underlying principles
that the great hero, who
had defeated the Triad of
Evil, started down the
path that led to
Avatarhood.

For verily it is known
that the three principles
are Truth, Love and
Courage;
And that from Truth
arises Honesty;
And from Love arises
Compassion;
And from Courage arises
Valour;
And that Truth comingled
with Love gives rise to
Justice;
And Love comingled with
Courage gives rise to
Sacrifice;
And Courage comingled
with Truth gives rise to
Honor;
And Truth, Love and
Courage all united create
Spirituality;
And the absence of all
three principles leads to
the vice of pride, which
leads us to think of the
virtue that is its
opposite, that of
Humility.

And on the quest to
become the embodiment of

the eight virtues, the
Avatar recovered the
Codex of Ultimate Wisdom,
and discovered that the
one underlying concept
that leads to the three
principles which lead to
the eight virtues is
Infinity. Ponder this
well, oh seeker!
